

AVON BLOG

NOVEMBER EDITION

For our Design and Technology work this term we have been designing and making Baby Bear's chair. We investigated strong shapes and realised that when using paper, tubes and folds can make a structure stronger. We used these ideas to create our own designs for Baby Bear.

Not everything went to plan however! The tape we used didn't stick very well and the bigger our models were, the weaker they were. If we were to do this again we would make sure that we measure accurately so that the chairs stay standing up. We would use less tape and more folded joins as they ended up being much stronger. We would also decorate with fancy things like feathers, sequins and fur!

WHAT'S NEW?
